

# The Tomcat Tiger

SLEEK, STYLISH, BRILLIANT DESIGN!

Tiger with Cord Pull Brake

Hi! My name is Tiger and I am the new trike from **Tomcat**, the people who invented Carer Control™ for special needs trikes. I was designed for children aged between 2 and 8 and those with a wide range of conditions can ride me. (Tomcat design Trikes for all ages, from 2 years old to adult – see the Tomcat Trike for all other age groups.)

My Carer Control System™ has a joystick arm behind the trike that connects to the steering and brakes and means that mum, dad or my carer are always in control. All they need do is move the joystick right or left to steer me or pull back on the lever to apply the brakes.

For children who can steer, I have a clever cord that can be pulled to apply just the brakes. If my rider can steer and brake then you can remove either the Carer Control System or my Cord Pull brake in seconds, giving them complete independence – brilliant!

All children love my stylish good looks and schools and playgroups love me too because I am so versatile. Here are just a few of the benefits I can bring...

- My Carer Control™ is brilliant for children with severe learning difficulties or visual impairment.
- My Cord Pull brake is perfect where weak grip or behaviour is the problem.
- It's easy to change between my control systems – they just "plug in".
- I have an excellent life span thanks to my versatile design.
- Because my pedals aren't as wide spaced as most small trikes, my rider's posture is just right and that's really important.
- I'm completely maintenance free because all my working parts are inside my frame.
- I've got a complete range of interchangeable accessories including: foot and leg supports, backrests, thoracic and pelvic supports, waistcoats, breastplates, headrest, pommel and swivel saddle.
- I've got a choice of 5 easily changed gear ratios to suit all abilities.
- My Park Brake is brilliant when getting on or off.
- I am available for children aged 2–5 years and I'm great for kids with restricted growth too.
