SAFEGUARD BED

KEEPING CHILDREN SAFE AND SECURE AT NIGHT

The 'Safeguard Bed Surround' was invented in 1999 for a child with Angelman Syndrome, so we really do have an understanding of the problems faced by many families and carers. With this experience to draw from, we now specialise in designing and building bespoke items to overcome specific sleep problems.

The Safeguard Bed is constructed from Alaska Pine and attention to detail is given to ensure the appearance is of a large decorative cot.

HOW IT WORKS!

The sides of the bed stand approximately 1 metre above the mattress. When the gate is closed the hidden locking mechanism clamps the sections together and removes any twisting, pulling and moving over the whole frame. The standard Safeguard Bed is designed to incorporate a 3'x 6' standard mattress.

All locks, catches, hinges etc are manufactured to high standards and are carefully concealed from little fingers! Finally, the Safeguard Bed is finished in childproof lacquer to enhance the appearance and protect the child.

For quality assurance all our products are manufactured to a very high standard and in accordance with The General Product Safety Regulations (1994) and the British Standard BS EN 747-1. The manufacturing process is ISO 9001:2000 accredited.

OPTIONS

- Protective bumpers.
- Size variants for specific requirements.
- Visco-Elastic Pressure Relieving Memory Mattress (energy absorbing and temperature sensitive responding to the user's natural body heat).

Healthcare Professionals acknowledge that the Safeguard Bed Surround is a manageable solution to ensure a child is safe and secure in their own bed. Enjoy your sleep knowing your child will not embark on the great escape!

- VAT zero rated for disabled individuals.
- Suppliers to local authorities, national companies, and private individuals.

(Please note that due to constant design improvements without compromise, each unit may vary slightly in appearance.)
